

Sale Name: Superior Taxidermy & Artifact Auction

LOT 173 - 84 2/8" net Boone & Crockett Pronghorn Antelope Shoulder Taxidermy Mount

Description

Usually it takes 16 1/4" to 16 1/2" horn lengths for a Pronghorn to make the All Time Book. This one is only 15 1/8", but his bases are incredible 7 7/8" inches around, and he carries the horn mass for most of the length of the horns. Also he has average to below average Prongs, but again the mass brings up the score. So, if you like Horns that are thick and heavy, this big Prairie Goat is the one for you. The mount is in mint-like condition with grade 9.75 in taxidermy quality.

Quantity: 1
