LOT 337 - Very Cool (Pre-Marine Mammal Act) Polar Bear Rug Taxidermy Mount

Description

This is a little better than a average size Boar. The rug lady really stretched this one wide which is fine. The Rug is 8 feet 1 1/2" inches long from the nose to a straight line drawn across the edge of the back feet. From front Paw to other front Paw the Bear measures 8 feet 1" long. For being taken in the 1950's, this Bear Rug is in remarkable condition. This is one of the very few legal Polar Bear Rugs that is in good shape that you will find for sale. This Rug has all of its claws and display well.
